

From Kent Christensen

The next conference call will be April 21, 2010 at 1:00 PM CDT. This is a change from what was sent in the March 17th agenda.

There is a tentatively scheduled I2/GPN Technical Conference Call on March 30 at 2:00 PM CDT

This call will be used to discuss upgrades and future plans of each network.

Some possible questions that GPN would like I2 to answer are:

How long do they plan to be in the Level3 facilities in KC?

How and when will the ION transition take place?

How does I2 qualify who can peer with them in the I2CPS?

#### 2010 Planning Process Update

The Planning Sub-Committee had a call on March 10.

After much discussion two things were decided:

GPN should module itself around the I2 Hybrid port and for true redundancy a second geographically diverse location is needed.

#### Status of Service Requests

Vlan for WiscNet ESNNet peering - PJ is waiting to hear from Jeff Bartiq

Vlan for ESNNet/FNAL to UNL Kent needs to work with FNAL to get this working,

a Vlan number has already been assigned - 3550

#### New Service Requests

None

#### Action Item Updates

The 2nd 10 Gig connection is up and running and as of 03/15 at 7:00 AM I2 CPS peering is active.

NOC Request Template - Kent will talk with PJ and Shannon to come up with a template.

#### Other items

Paul asked what happened to the GPN switch to OmniPop switch 10 Gig connection through Boreas.

It will be discussed at the next Sub-Committee meeting to get it moving again.
